

more C# don't cause errors.

```
// Missing "using" statements

var ocean = new List<string>();
ocean.Add("sea otter");
ocean.Add("dolphin");
ocean.Add("shark");

var scary = ocean.Where(x => x == "shark");
```

```
using System.Collections.Generic;
using System.Linq;
```

```
using Collections.Generic;
using Linq;
```

```
using System.Data;
using System.Queries;
```

```
using System.IO;
using System.Linq;
```

Correct! **System.Linq** enables the **Where** operator and **System.Collections.Generic** enables the **List<T>** class.
