

Diary and **Dissertation** inherit from the **Book** class, which inherits from **Object**. Which of these is an *implicit upcast*?

```
Book o = new Book();
```

```
Diary o = (Diary) new Book();
```

```
Dissertation diss = (Dissertation) new Book();
```

```
Object o = new Book();
```

Correct! A **Book** object is upcast to its superclass, **Object**.
