Create a `while` loop that prints out every number in the array.

```
double[] lapTimes = {4.00, 5.32, 4.68, 3.95};

int j =       0      ;

while (j <    lapTimes.Length    )
{
   Console.WriteLine(lapTimes[j]);
       j++      ;
}
```

👏 You got it!
